AM300 & AM500 Series Controllers

High performance, compact EtherCAT-enabled CODESYS controller

Features & functions

- PLCopen compliant axis control
- EtherCAT real-time and multiprotocol
- IEC 61131-3 compliant CODESYS software
  · Built-in self-tuning PID
- Compact footprint: 53*100*80mm
- Quad-core processor, instruction processing speed as low as 9.9ns
  · Supports up to 16*GL20 local expansion I/O modules
  · 2 expansion slots, with analog, digital, CAN, RS485, TF card andRTC optional

OPC UA EtherNet/IP EtherCAT CANopen CODESYS

About Inovance

The Inovance Group, founded in 2003, is a rising star in the global industrial automation business and has revenues of $4.2 in 2023. Inovance is headquartered in Shenzhen, China, and has built a global operation with offices and facilities in Germany, France, Italy, Spain, Turkey, India, and South Korea. Additionally, the company has a strong network of distribution partners around the world.

The company 's flexible production techniques and expert understanding of all industry sectors - from plastics to printing to packaging to iron & steel production - have allowed it to establish globally leading industry-specific business units. Over the years, Inovance has built an engineering team with specialist expertise in industrial automation. This knowledge allows it to form strong partnerships with OEMs and end users, providing ongoing advice about how to get the most out of their automation solutions today, and how to stay prepared for the market and technology changes that are coming in future.

Worldwide R&D network

Inovance invests heavily in R&D, enabling the company to continuously releease a steady stream of new and innovative products. To ensure that all products meet all key global standards wherever possilble, Inovance's R&D teams in Europe, India, and China, all work together seamlessly and virtually on engineering projects. Inovance calls this co-development, and the practice ensures that the best technology knowledge and solutions can be gathered from all around the business; and that they are always implemented and adapted in a way that meets the needs of local markets. The company's commitment to innovation is demonstrated through its headcount: over 20% of Inovance's entire global workforce is in R&D.

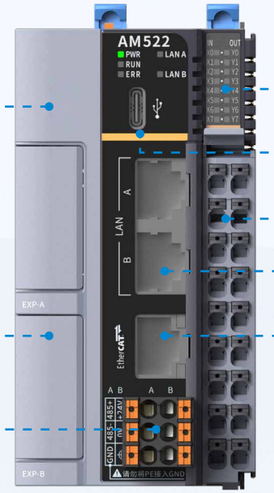
AM320/AM522 Controllers Overview



- QR code scanning for User Guide
- I/O LED indicator
- Type-C port for programming & debugging (with power supply)
- Push-In I/O terminals
- Dual EtherNet ports
- Modular expansion cards
- EtherCAT port (AM300 without)
- DC 24V power supply /485 serial ports

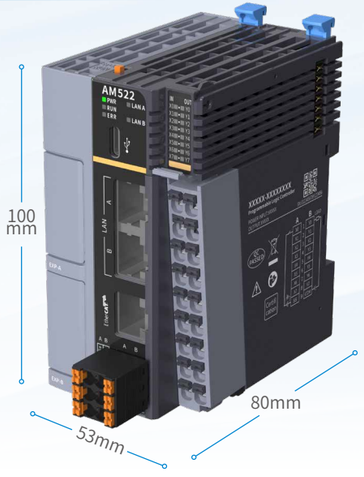
AM320

AM521/AM522



CPU with dual Ethernet port

- Quad-core processor
- Dual network port with independent IP Address
- 2 expansion slots
- 30 CANopen axes for PTP movements(optional card required)
- 4 pulse axes
- 4 encoder inputs (8×high speed inputs,up to 200 kHz)
- Supports up to 16 GL20 local expansion modules

Motion control CPU

- Quad-core processor
- EtherCAT real-time network
- 2 expansion slots
- 8 (AM521) or 16 (AM522) EtherCAT synchronized axes
- Up to 127 EtherCAT slaves
- 30 CANopen axes for PTP movements (optional card required)
- 4 pulse axes
- Axis group for linear and circular interpolation
- 4 encoder inputs (8×high speed inputs,up to 200 kHz)
- Supports up to 16 GL20 local expansion modules I/O can be expanded by using EtherCAT bus coupler GL20-RTU-ECT

Compact design and tool-free wiring

Simple lever system allows easy removal of individual modules from the DIN rail

Easy wiring with spring-type terminals, with large 1.5mm2 apertures

Codesys based platform

- InoProShop PC-tool
- IEC 61131-3 compliant CODESYS sofware

CODESYS InoProShop

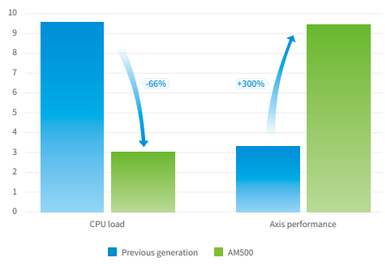
- PLCopen compliant

PLCopen motion control

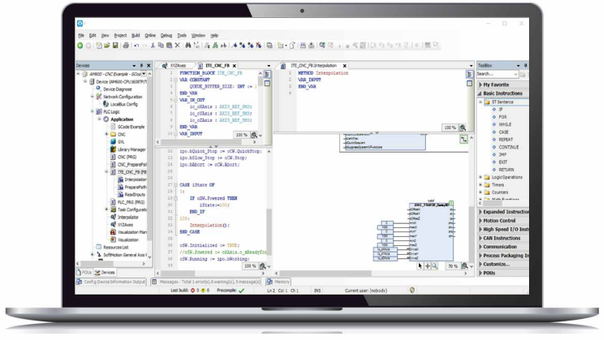
- Programming languages LD, ST, SFC
- Intuitive axis and local/remote I/O configuration
- Easy to integrate INOVANCE servos and AC drives
- CAM table can be easily configured by using the graphical editor
- Monitor, trace and gather any program variable with the virtual oscilloscope function

Higher performance than previous generation

SINGLE CORE **QUAD** CORE



- 1ms EtherCAT cycle with 4 synchronized axes(AM521/AM522)
- Supports up to 127 EtherCAT slaves(AM521/AM522)
- Support up to 16 EtherNet/IP slaves
- Supports up to 63 Modbus TCP slaves
- Supports up to 16 OPC UA clients
- Supports up to 31 Modbus RTU nodes
- Supports up to 63 CANopen slaves



Scalable system architecture
Multiple configurations

The AM320 and AM521/AM522 controllers can cover anything from the simplest PLC application to the most complex motion control application using EtherCAT servo drives. In addition, they support a wide variety of industrial protocols such as Modbus TCP, Ethernet/IP, CANopen, OPC-UA.

AM320

CPU with two independent IP addresses network ports.
It supports two Modbus TCP or Ethernet/IP master-slave communication.
Machine network isolated from external network.
Redundant Ethernet network.

AM521/AM522

GE20 Series Expansion Card

The GE20 series expansion cards include nine types, covering digital I/O and analog I/O and their combinations, as well as serial communication, clock expansion, and TF card expansion. These cards can precisely suit your needs while saving space. They are compatible with the Easy series compact PLCs, which can support up to two expansion cards.

GL20 Series I/O Modules

The GL20 series I/O modules, introduced by Inovance, represent the next generation of modules designed for common bus networks. With an ultra-slim profile of as thin as 12 mm, they achieve as fast response as in microseconds, along with a flexible I/O system and a stable structural design.

The GL20 series I/O modules are designed and continuously improved with the needs of various industries in mind. They have many variants and offer abundant input and output channels, providing extensive customization options for costumers.

More than "slim"

Flexible System

Applicable to either bus coupler or CPU.

Compact Size

Ultra-slim I/O module as thin as 12mm, for fast installation and replacement.

Stable & Durable

D-BUS connectors, outperforming traditional surface-mounted connectors by enhanced stability and ten-year lifespan that minimizes downtime
